SUMMARY

Backend-focused Full-Stack developer skilled in Python, Javascript, Django, and React, with hands-on experience building and deploying full-stack applications including social media, e-commerce, and management systems. Strong understanding of REST APIs, authentication, and scalable backend design.

SKILLS

Languages: Python, JavaScript, C++, MySQL, PostgreSQL

Framework and Tools: Django, Django REST Framework (DRF), React.js, Tailwind CSS

Concepts: REST APIs, Authentication (JWT), OOP, Data Structures & Algorithms

PROJECTS

Whistle – Social Media Platform | Django, DRF, React, PostgreSQL

A full-stack social media application supporting user interaction and content sharing.

- Implemented JWT-based authentication with user registration, login, and secure access control
 - Designed REST APIs for stories, comments, and user profiles with role-based permissions
 - Optimized data retrieval using pagination and query improvements (`select_related`) and deployed with live demo access
-

Event Management System | Django (MVT), PostgreSQL

A platform for creating and managing events with participant registration.

- Implemented event creation, listing, and registration functionality
 - Applied role-based logic for event organizers and participants
 - Added validation for event scheduling and participant limits
 - Developed clean UI using Django templates
-

PROBLEM SOLVING

- Solved **200+ problems** across LeetCode and Codeforces covering arrays, strings, linked-lists, trees, dp and graphs,
 - Familiar with algorithmic problem-solving and core data structures
-

EDUCATION

Physics

Bsc.

Shahjalal University of Science and Technology

Year: 2018-2024

CERTIFICATIONS

CSE Fundamentals with Phitron –Phitron

Year: March'2024 - September'2025

- Hands on experience on DSA, OOP,MySQL, Python, JavaScript, Django and React
- Completed real-life projects and problem-solving
